Managing Information Technology in a Global Economy

This comprehensive study of a range of contemporary career issues faced by both individuals and organizations has been revised and updated to reflect the most recent research and trends. The primary thrust of the latest edition is change—organizational change, changes in the work force, and changes in peoples lives. Among the topics discussed are the meaning of work, the implication of change on careers, career planning and management, practical applications of career choice, and organizational support practices. A glossary of terms has also been included to aid in the comprehension of the concepts related to each chapter.

This year, we received a record high of about 180 submissions to ICWL 2007. From these, a total of 55 full papers plus one keynote paper were accepted for this LNCS proceedings volume, representing an acceptance rate of about 30%. The authors of these accepted papers were of a remarkable international diversity. We would like to thank all the reviewers for spending their precious time reviewing the papers and for providing valuable comments that aided significantly in the paper selection process. Authors of the best papers presented at this conference will be invited to submit extended versions of their papers for possible publication in 1) a special issue of IEEE Trans. on Knowledge and Data Engineering, for those papers relevant to knowledge and data engineering; and 2) a special issue of the International Journal of Distance Education Technologies (JDET), for papers of other areas. This was the first time that the ICWL conference was organized in Europe and 27 papers were from European researchers. We would like to thank our Organization Chair Dr. Taku Komura for spending an enormous amount of energy in coordinating the local arrangements. In fact, we would like to thank the entire conference organization committee for their hard work in putting together the conference. In particular, we would like to express our appreciation to our Registration Chair Dr.

This book constitutes the thoroughly refereed post-conference proceedings of the 11th International Joint Conference on Biomedical Engineering Systems and Technologies, BIOSTEC 2018, held in Funchal, Madeira, Portugal, in January 2018. The 25 revised full papers presented were carefully reviewed and selected from a total of 299 submissions. The papers are organized in topical sections on biomedical electronics and devices; bioimaging; bioinformatics models, methods and algorithms; health...

Well-Being Research in South Africa

Niles' Weekly Register This book is a collection of selected papers presented at the First International Conference on Industrial IoT, Big Data and Supply Chain (IIoTBDS), held as an online conference due to COVID-19 (initially to be held in Macao, Special Administration Region (SAR) of China), during September 15–17, 2020. It includes novel and innovative work from experts, practitioners, scientists and decision-makers from academia and industry. It brings multi-disciplines together on IIoT, data science, cloud computing, software engineering approaches to design, development, testing and quality of products and services.

Government Reports Announcements & Index This is the first book to bring together examples of research in positive psychology / psychofortology conducted in the multi-cultural South African context with its diverse populations and settings. The volume reflects basic as well as applied well-being research in the multicultural South African context, as conducted in various contexts and with a variety of methods and foci. Theoretical, review, and empirical research contributions are made, reflecting positivist to constructivist approaches, and include quantitative, qualitative, and mixed-method approaches. Some findings support universality assumptions, but others uncovered unique cultural patterns. Chapters report on well-being research conducted in the domains of education, work, health, and family, and in clinical, urban vs. rural, and unicultural vs. multicultural contexts. Studies span the well-being of adolescents, adults, and older people, and topics include resilience in individuals, families, and groups, measurement issues and coping processes, the role of personal and contextual variables, and facets such as hope, spirituality, self-regulation, and interventions.

South African National Bibliography

Advances in Agile and User-Centred Software Engineering

XXX International Congress of Psychology: Abstracts A major shift in research methodology from technical to more contextual and pragmatic approaches, this thorough resource incorporates new trends while also providing comprehensive coverage of the full range of established research approaches and techniques, skillfully combining epistemology, methodology, statistics, and application in a volume that is both sophisticated and practical. Placing a greater emphasis on interdisciplinary and applied research skills, this guide encourages the concurrent use of qualitative and quantitative methods and explores such complex topics as ethical issues in social science research; inferential statistical methods; and Marxist, feminist, and black scholarship perspectives.

Advances in Web Based Learning - ICWL 2007 Brutally dragged 780 metres beneath a taxi, a young woman’s inspiring story of survival, courage, and the will to live. 13 September 2011. The story would shock thousands and be remembered by many for years to come. It would be plastered all over the papers and continue to attract interest well after the shock factor of what happened had passed. Reports and articles would be written, and “facts”, as given to reporters by some of those involved and willing to be interviewed, would be recounted and repeated in all forms of public media over the months and even years that followed. And although these versions would generate widespread outrage, none was entirely accurate. The stories were about me. I was there. I am Kim McCusker, “the girl who was dragged by a taxi”. This, as I experienced it, is the true version of events.

Multimedia, Interaction, Design and Innovation, MIDI 2019, which took place under the umbrella of the 14th Federated Conferences on Computer Science and Information Systems, FedCSIS, in Leipzig, Germany, in September 2019. LASD 2019 received a total of 30 submissions, of which 6 full and 1 short paper are included in this volume. For MIDI 2019 one short paper was accepted for publication in this book, from a total of 6 submissions.

Research in Practice

Abstracts for the AGU Western Pacific Geophysics Meeting This volume collects a selection of contributions which has been presented at the 22nd Italian Workshop on Neural Networks, the yearly meeting of the Italian Society for Neural Networks (SIREN). The conference was held in Italy, Vietri sul Mare (Salerno), during May 17-19, 2012. The annual meeting of SIREN is sponsored by International Neural Network Society (INNS), European Neural Network Society (ENNS) and IEEE Computational Intelligence Society (CIS). The book - as well as the workshop- is organized in three main components, two special sessions and a group of regular sessions featuring different aspects and point of views of artificial neural networks and natural intelligence, also including applications of present compelling interest.

Navorsingsverslag The abstracts of the XXX International Congress of Psychology (July 2012, Cape Town) are published as a supplement to Volume 47 of the International Journal of Psychology. The published volume includes the abstracts of the invited addresses, symposia, oral and poster presentations, numbering over 5,000 separate contributions and creating an invaluable overview of the discipline of psychological science around the world today.

Statistical Theory and Method Abstracts

Monographic Series Today, opportunities and challenges of available technology can be utilized as strategic and tactical resources for your organization. Conversely, failure to be current on the latest trends and issues of IT can lead to ineffective and inefficient management of IT resources. Managing Information Technology in a Global Economy is a valuable collection of papers that presents IT management perspectives from professionals around the world. The papers introduce new ideas, refine old ones and possess interesting scenarios to help the reader develop company-sensitive management strategies.
